

## Green tour across Siberia: **GORNO-ALTAYSK**

*The city that we know today as Gorno-Altaysk had many names in the past. Until 1932 it was called Ulala, later – Oyrot-Tura. There are no trains, you can get there only by car or by plane. But once you visit this place, you will want to return to the vast expanses of the Altai Mountains again and again.*

The longest street of the city, **Kommunisticheskyy Prospekt**, is only 0.3 km (6.7 km vs. 7 km) shorter than Krasny Prospekt in Novosibirsk.

**Chuyskiy Trakt** is one of the five most beautiful roads in the world (according to National Geographic).

**Belukha Mountain**, the highest summit of Siberia, lies in the Altai Mountains. It is located at an equal distance from three oceans: the Arctic, the Pacific, and the Indian.

**Uchar**, the largest cascading waterfall in Siberia with a drop height of 160 meters, is located here.

The Altai Mountains are a land of lakes and rivers. There are more than 7,000 water

reservoirs and 20,000 rivers throughout the region. The deepest lake is **Teletskoye**, глыби332 meters deep. While **Geyzernoye** lake is the warmest one; it does not freeze even in winter.

There are numerous unique places in the Altai Mountains: **caves, trails, and passes**. It will take us weeks or even months, to name all of them. So it is better to visit this place, fall in love with the beauty of this magical land and explore it year after year, discovering more and more places.

*The city is located in the south of Western Siberia and it is both the capital and the only city of the Altai Republic.*

**Time zone:** UTC+7.

**Telephone connection:** dialing code +7 38822
